# INDULGE YOUR PASSION.

If you already know the CARELINER|M, you should get to know the whole CARELINER family. The same genes, the same enjoyment. This is why the entire product family offers you maximum user convenience, lasting value for money and a calming transport environment for your horses.

This has a number of good reasons: The unique LONG-LIFE system, which is 100 % wood-free and therefore rot-proof, the BI-LED-Lighting that turns night into day, the intelligent BODY PROTECT chassis that ensures safe road handling at all times, the SAFETY FIRST safety concept for horse-related emergencies and an ergonomic environment that has a calming effect on your horse. And on top of all these outstanding technical features, the CARELINERs also look extremely stylish.

Our CARELINERs therefore feature everything that hallmarks first-class competition and riding horses – an optimum combination of interior and exterior.

**INDULGE YOUR PASSION.**

# COLOUR YOUR CARELINER!

Like a horse and its rider, a horse trailer and a car belong together. What could be more natural than an outfit that harmonises perfectly with contemporary automotive design? This was the question that sparked the creation of the CARELINER design concept.

It has impressively dynamic lines and an integrated styling concept which can be enhanced with a shapely panorama window. The Bücker PAINT-PICKER system is also innovative - 17 on-trend colours that you can choose to personalise your CARELINER with your own individual signature style – with a monochrome or two-tone finish on the trailer body and roof.

These are advantages that you can incorporate in almost any vehicle size – from the Golf class through to SUVs. The wide range of the CARELINER family products makes it all possible.

**LIVE YOUR STYLE.**

## ALUMINIUM WHEEL RIMS<sup>1</sup>

BI-LED

# OUR CORE COMPETENCE!

Our CARELINERs are 100 % wood-free and therefore rot-proof. The walls and rear loading flap are manufactured with a GRP sandwich construction with a core that prevents moisture absorption. The floor is similarly designed with an aluminium sandwich construction with a hydrophobic core. This means that your horse always has a safe vehicle to stand in – and you will be able to enjoy your investment permanently.

The Bucker - LED package also ensures a bright environment:

- The BI-LED LIGHT that can be switched from white light to a calming blue – and back again.
- Tack room lighting so that you never have to fumble around in the dark again
- The Bucker AMBIENT-LED-LIGHT system that ensures safe loading and unloading at night.

## 3. BRAKE LIGHT<sup>1</sup>

RELEASE-SYSTEM

EVERYTHING ALWAYS UNDER CONTROL  
IN EMERGENCIES.

PLUS +

# YOUR BODYGUARD!

## THE BODY-PROTECT-PLUS CHASSIS

### CHASSIS

FOR OPTIMUM AND SAFE  
ROAD HANDLING.

1,3

Hitting 100 km/h on the motorway or manoeuvring over bad roads - only a horse trailer that masters both extremes can offer a truly smooth ride.

The Bucker BODY-PROTECT chassis has a reinforced frame that ensures optimum road handling in all conditions. What's more, it earns extra kudos for the integration of an independent wheel suspension and additional shock absorbers – a further development of existing automotive manufacturing design. That's why we call it the Bucker BODY-PROTECT-PLUS.

No matter which chassis you choose – the lowered design always ensures extremely easy access for you and your horse.

<sup>1</sup> Optional accessory.

<sup>2</sup> Can vary in different countries.

<sup>3</sup> Standard CARELINER I XL.

### ANS+

THE BRAKE THAT ADJUSTS  
AUTOMATICALLY. FOR EXTRA SAFETY.  
STANDARD FEATURE ON THE  
CARELINER.

### ASK+<sup>1</sup>

THE STABILIZING COUPLING PREVENTS  
THE VEHICLE COMBINATION BREAKING  
AWAY. FOR ADDED STABILITY!

### SAFE+<sup>1</sup>

ANTI-THEFT DEVICE. MORE SAFETY  
FOR YOUR CARELINER.

# LOTS OF SPACE FOR TACK!

Whichever type of tack room you choose, with CARELINER you will always make the right choice. Whether you opt for the „Standard“ or „Premium“ tack room in the CARELINER|M or |ALU or whether you get the Premium tack room as standard in the CARELINER|L is entirely up to you. The „Premium“ tack room offers you the convenience of an extending saddle rack. This means you can load and unload your saddles easily without having to bend down. In addition to the premium tack room, the CARELINER|L also features another door from the tack room to the interior of your horses. Your equipment is kept dry and clean in all weathers.

In the CARELINER|XL you can enjoy maximum space, storage room and comfort. In the walk-in tack room you can comfortably change your clothes or take a short break on the stool and are protected from prying eyes by the tinted windows. With the pivoting saddle rack you can also access your saddles quickly and easily from the outside. The option of a door to the horse compartment gives you even quicker access from the tack room to your horses.

**EXPERIENCE THE DIFFERENCE!**

## EXTENDING SADDLE RACKS<sup>4, 5</sup>

NO MORE BACK-BREAKING BENDING.

## INSIDE TACK ROOM DOOR<sup>5</sup>

DIRECT ACCESS TO EVERYTHING FROM THE INTERIOR.

## WALK-IN TACK ROOM XL<sup>3</sup>

MAXIMUM SPACE, STORAGE ROOM AND COMFORT.

<sup>3</sup> Standard CARELINER | XL.

<sup>4</sup> Optional CARELINER|M |ALU.

<sup>5</sup> Standard CARELINER|L.

# THE FAMILY. BÜCKER TRAILERS.

## PHILIPP BÜCKER

MANAGEMENT,  
MARKETING & SALES

## TOBIAS BÜCKER

SALES, HORSE & RIDER ERGONOMICS

## BERNHARD BÜCKER

FOUNDER († 2018)

## SEBASTIAN BÜCKER

MANAGEMENT,  
DEVELOPMENT & TECHNICAL IMPLEMENTATION

The second generation of the Bucker family was literally born into the world of equestrian sports. As early as the 1970s, the company founder Bernhard Bucker bought a horse carriage for extended family excursions. Since then his sons have developed a passion for horses in their own individual way.

Tobias Bucker holds several single and team carriage driving world champion titles. Together with his brothers, Philipp and Sebastian, he has brought his experience into the family business.

The company has now become an acknowledged system supplier of the most successful horse trailer models on European roads. It also boasts more than 50 years of experience in plastics, a competence in high demand in many other industries. In short: Bucker is another word for quality “made in Germany” – crafted in the inspiring atmosphere of the “horse stronghold” of Westphalia.
